

TensorFlow Enterprise documentation

Long Term Version Support is separate from any other support (such as Technical Support Services/TSS) or Deprecation Policy offered for any related Google Cloud Services under the Google Cloud Terms of Service.

TensorFlow Enterprise makes it easier to develop and deploy TensorFlow models on Google Cloud, by providing users with a set of products and services, which provide enterprise-grade support and cloud scale performance. Users can get the benefits of TensorFlow Enterprise by using the TensorFlow Enterprise Distribution on AI Platform Notebooks, AI Platform Deep Learning Containers and AI Platform Deep Learning VM Image.
