

Advanced Solutions Lab

Build high-impact business solutions alongside Google machine learning experts

The Advanced Solutions Lab is an immersive training program that provides a unique opportunity for technical teams to learn from Google's machine learning experts in a dedicated, collaborative space on Google Campus.

C

Full-time, four-week intensive on Google Campus

Apply machine learning at scale

"We started with an investment in talent. We sent 2 classes to Google's Advanced Solutions Lab for intense training in supervised machine learning. This cohort became the foundation for our work in Al. Internally we refer to this decision as a 'no regrets' decision"

Nick Osborn

Leader of the Global Machine Learning Project Management Office, AES Corporation

>

On-site education in dedicated, collaborated spaces

The program consists of a full-time, four-week intensive program developed from the same core curriculum Google uses to train their engineers on machine learning. Your team will have the opportunity to dive into their chosen use case and how machine learning can help improve business performance and achieve key objectives. At program completion, attendees will be prepared to apply machine learning at scale and tackle challenging machine learning scenarios.

- ✓ Available in the Bay Area, New York, Dublin, Singapore, and Tokyo
- Immersive, hands-on training in key machine learning areas using TensorFlow,
 Al Platform tools, systems, and APIs
- ✓ Full-time, cohort-based approach

✓ Dedicated, badge-secured Google workspace accessible only to your team for the duration of the project
