

How-to Guides

Beta

This product is covered by the [Pre-GA Offerings Terms \(/terms/service-terms#1\)](/terms/service-terms#1) of the Google Cloud Platform Terms of Service. Pre-GA products may have limited support, and changes to pre-GA products may not be compatible with other pre-GA versions. For more information, see the [launch stage descriptions \(/products#product-launch-stages\)](/products#product-launch-stages).

Before you begin

Set up your Google Cloud Platform project and authentication, enable AutoML Tables.
(</automl-tables/docs/before-you-begin>)

Preparing your training data

Organize and label the data that you will use to train your model.
(</automl-tables/docs/prepare>)

Creating datasets and importing data

Create datasets and import your tabular data.
(</automl-tables/docs/import>)

Training models

Review and update your dataset schema and then train your model.
(</automl-tables/docs/train>)

Evaluating models

Review model evaluation metrics and improve your model.

[\(/automl-tables/docs/evaluate\)](#)

Online predictions

Get a prediction for a set of values based on your model.

[\(/automl-tables/docs/predict\)](#)

Batch predictions

Get predictions for multiple sets of values based on your model.

[\(/automl-tables/docs/predict-batch\)](#)

Explaining predictions

Gain visibility into how a model used its training data and makes its predictions.

[\(/automl-tables/docs/explain\)](#)

Exporting models

Export your model and run the model in Docker to serve predictions.

[\(/automl-tables/docs/model-export\)](#)

Managing datasets

Manage your datasets.

[\(/automl-tables/docs/datasets\)](#)

Managing models

Manage your custom models.

[\(/automl-tables/docs/models\)](#)

Viewing model architecture

Viewing the structure of your model using Cloud Logging.

(/automl-tables/docs/logging)

Working with long-running operations

Get status for, wait for, or cancel your long-running operations.
