Alexa import and export

Dialogflow to Alexa

You can export your Dialogflow agent to a file and import the file in the Alexa Developer
Console.

Caution: All intents for multilingual agents are exported to one Alexa language model
(https://developer.amazon.com/en-US/docs/alexa/smapi/interaction-model-schema.html#languagemodel)
.

Export from Dialogflow

1. Go to the Dialogflow Console (https://dialogflow.cloud.google.com).

2. Click **Integrations** on the left sidebar menu.

3. Click **Amazon Alexa**.

4. Click **Export For Alexa**.

5. A `zip` file is downloaded.

6. Extract the `IntentSchema.json` file from the `zip` archive.

Import to Alexa

1. Drag and drop the `IntentSchema.json` file to the JSON Editor of the Alexa Developer
   Console (https://developer.amazon.com/docs/devconsole/about-the-developer-console.html).

2. Click **Save Model**.

3. Click **Build Model**.

4. You may need to resolve conflicts due to differences in naming and field conventions.

Alexa to Dialogflow

You can export your Alexa skills to a file and import the file in the Dialogflow Console.

Export from Alexa

1. Copy the content of the JSON Editor on the Alexa Developer Console
   (https://developer.amazon.com/docs/devconsole/about-the-developer-console.html).
2. Save the content to a file named `IntentSchema.json`.
3. Archive the `IntentSchema.json` file in a `zip` file.

Import to Dialogflow

1. Go to the Dialogflow Console (https://dialogflow.cloud.google.com).
2. Click **Integrations** on the left sidebar menu.
3. Click **Amazon Alexa**.
4. Click **Import From Alexa** or **Restore From Alexa**.
5. Select the `zip` file you created above as the source.
