

# Setting up on Apps Script

Error Reporting exception grouping is automatically enabled for Google Apps Script logs. **No additional setup is required** beyond enabling exception logging in Apps Script. For details on this integration, read the [Apps Script documentation](https://developers.google.com/apps-script/guides/logging#stackdriver_error_reporting)

([https://developers.google.com/apps-script/guides/logging#stackdriver\\_error\\_reporting](https://developers.google.com/apps-script/guides/logging#stackdriver_error_reporting)).

If you want to view error and exception data for your application in the Cloud Console, see [Viewing errors](/error-reporting/docs/viewing-errors) (/error-reporting/docs/viewing-errors).
