Adding a GCP Marketplace product

In this guide, you learn how to add products from the Google Cloud Marketplace to your catalog. You can add the product as a [Cloud Deployment Manager template-based](https://cloud.google.com/private-catalog/docs/dm-based-solution) (https://cloud.google.com/private-catalog/docs/dm-based-solution) solution to share with your users. This allows you to approve and share a custom list of GCP products with enterprise users through your catalog.

Adding a Google Cloud Marketplace product

To add a Google Cloud Marketplace product:

1. Find the product you want to add in the [GCP Marketplace page](https://console.cloud.google.com/marketplace/browse?filter=solution-type:vm) (https://console.cloud.google.com/marketplace/browse?filter=solution-type:vm) of the Cloud Console.

GO TO THE GOOGLE CLOUD MARKETPLACE PAGE (HTTPS://CONSOLE.CLOUD.GOOGLE.COM/MARK

2. Deploy the product. This takes you to the Deployment Manager page.

★ **Note:** Remember to delete the deployment when you're done with it, to avoid unanticipated costs.

3. Create a new deployment package for the product using the [Cloud Deployment Manager templates](https://cloud.google.com/deployment-manager/docs/configuration/templates/create-basic-template) (https://cloud.google.com/deployment-manager/docs/configuration/templates/create-basic-template)

- a. From the list of deployment properties for the product, click **View** for the Config property to see the Cloud Deployment Manager template.
 - b. Copy and paste the content from the Cloud Deployment Manager template to a new Cloud Deployment Manager configuration (<https://cloud.google.com/deployment-manager/docs/configuration/>) file.
 - c. Copy and paste the content from all the **Imports** and add them to the same folder as the Cloud Deployment Manager configuration file, using the same filenames as shown in the **Imports** section.
 - d. Add the configuration file and all the imports to a `.zip` file. The `.zip` file is your deployment package.
4. Follow the steps in adding a Deployment Manager-based solution (<https://cloud.google.com/private-catalog/docs/dm-based-solution>) to add the product to your catalog.

Next steps

- Add a Deployment Manager-based solution (<https://cloud.google.com/private-catalog/docs/dm-based-solution>).
