

[Private Catalog](https://cloud.google.com/private-catalog/) (https://cloud.google.com/private-catalog/)

[Documentation](https://cloud.google.com/private-catalog/docs/) (https://cloud.google.com/private-catalog/docs/) [Guides](#)

Sharing a catalog

In this guide, you learn how to share a catalog with users. After you [create a catalog](https://cloud.google.com/private-catalog/docs/create-catalog) (https://cloud.google.com/private-catalog/docs/create-catalog), and add either a [link-based](https://cloud.google.com/private-catalog/docs/link-based-solution) (https://cloud.google.com/private-catalog/docs/link-based-solution) or [Cloud Deployment Manager template-based](https://cloud.google.com/private-catalog/docs/dm-based-solution) (https://cloud.google.com/private-catalog/docs/dm-based-solution) solution, you can share Private Catalog solutions with your users.

Before you begin

- End users can only see catalogs that are shared to the organization, folder, or project that the end user has access to. Make sure to share the catalog to a place in the hierarchy that your user can access.
- The end user needs either the `roles/cloudprivatecatalog.consumer` IAM role or a viewer IAM role for the relevant organization, folder, or project. Most end users access Private Catalog using the viewer IAM role.

Share a catalog

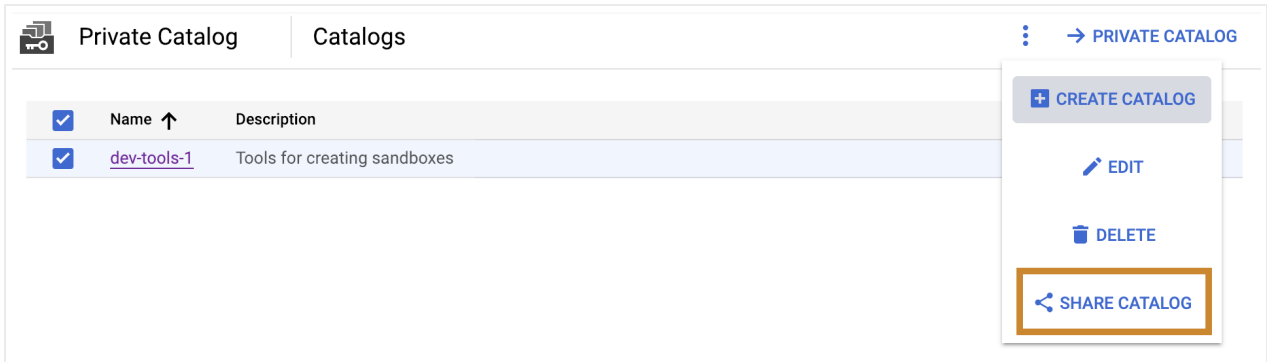

To share a catalog:

1. Go to the Cloud Console [Private Catalog](https://console.cloud.google.com/project/_/catalog) (https://console.cloud.google.com/project/_/catalog) page.

GO TO THE PRIVATE CATALOG PAGE (HTTPS://CONSOLE.CLOUD.GOOGLE.COM/PROJECT/_/CATALOG)

2. Click **Manage solutions**.

3. From the list of catalogs, select the checkbox next to the catalog that you want to share.
4. Click the more options (ellipsis) button.
5. Click **Share Catalog**.

6. From the dropdown menu, select a folder, organization, or project that you want to share the catalog with, and then click **Select**.

If you're sharing a catalog with a new project, the end user is prompted to enable the Cloud Deployment Manager API and the Private Catalog API when launching a solution.

Next steps
