

# Google Cloud SDK documentation

Google Cloud SDK is a set of tools that you can use to manage resources and applications hosted on Google Cloud Platform. These include the [gcloud](/sdk/gcloud/reference) (/sdk/gcloud/reference), [gsutil](/storage/docs/gsutil) (/storage/docs/gsutil), and [bq](/bigquery/bq-command-line-tool) (/bigquery/bq-command-line-tool) command line tools. The gcloud command-line tool is downloaded along with the Cloud SDK; a comprehensive guide to the gcloud CLI can be found in [gcloud command-line tool overview](/sdk/gcloud) (/sdk/gcloud).

Additionally, the [gcloud CLI reference](/sdk/gcloud/reference) (/sdk/gcloud/reference) documents all of the gcloud CLI's functionality.

## Install the latest Cloud SDK version (288.0.0)

## Install the latest Google Cloud Client Libraries

You can download [Cloud Client Libraries](/sdk/cloud-client-libraries) (/sdk/cloud-client-libraries) for supported languages.

## Optional: Enable accessibility features

For a more streamlined screen reader experience, the gcloud command-line tool comes with an `accessibility/screen_reader` property.

To enable this property, run:

```
gcloud config set accessibility/screen_reader true
```

For more details about the accessibility features that come with the gcloud command-line tool, refer to the [Enabling accessibility features](/sdk/docs/enabling-accessibility-features) (/sdk/docs/enabling-accessibility-features) guide.
