NAME

gcloud alpha scc - manage Cloud SCC resources

SYNOPSIS

`gcloud alpha scc` *GROUP* `(`*GROUP*`)` [*GCLOUD_WIDE_FLAG* `(`*GCLOUD-WIDE-FLAGS*`) …`]

DESCRIPTION

`(ALPHA)` Commands for managing Google Cloud SCC resources.

GCLOUD WIDE FLAGS

These flags are available to all commands: --account (/sdk/gcloud/reference/#--account), --billing-project (/sdk/gcloud/reference/#--billing-project), --configuration (/sdk/gcloud/reference/#--configuration), --flags-file (/sdk/gcloud/reference/#--flags-file), --flatten (/sdk/gcloud/reference/#--flatten), --format (/sdk/gcloud/reference/#--format), --help (/sdk/gcloud/reference/#--help), --impersonate-service-account (/sdk/gcloud/reference/#--impersonate-service-account), --log-http (/sdk/gcloud/reference/#--log-http), --project (/sdk/gcloud/reference/#--project), --quiet (/sdk/gcloud/reference/#--quiet), --trace-token (/sdk/gcloud/reference/#--trace-token), --user-output-enabled (/sdk/gcloud/reference/#--user-output-enabled), --verbosity (/sdk/gcloud/reference/#--verbosity).

Run $ `gcloud help` (/sdk/gcloud/reference) for details.

GROUPS

GROUP is one of the following:

assets (/sdk/gcloud/reference/alpha/scc/assets)

`(ALPHA)` Manage Cloud SCC assets.

findings (/sdk/gcloud/reference/alpha/scc/findings)

> (ALPHA) Manage Cloud SCC findings.

operations (/sdk/gcloud/reference/alpha/scc/operations)

> (ALPHA) Manage Cloud SCC operations.

sources (/sdk/gcloud/reference/alpha/scc/sources)

> (ALPHA) Manage Cloud SCC finding sources.

NOTES

This command is currently in ALPHA and may change without notice. If this command fails with API permission errors despite specifying the right project, you may be trying to access an API with an invitation-only early access whitelist.
