Result containing the properties and count of a groupBy request.

JSON representation

Fields

properties	`map (key: string, value: value (`[Value](https://developers.google.com/protocol-buffers/docs/reference/google.protobuf#google.protobuf.Value)` format))`
	Properties matching the groupBy fields in the request.
	An object containing a list of `"key": value` pairs. Example: `{ "name": "wrench", "mass": "1.3kg", "count": "3" }`.
count	`string (`[int64](https://developers.google.com/discovery/v1/type-format)` format)`
	Total count of resources for the given properties.
