Creates a finding. The corresponding source must exist for finding creation to succeed.

POST
`https://securitycenter.googleapis.com/v1beta1/{parent=organizations/*/sources/*}/findings`

The URL uses gRPC Transcoding
 (https://github.com/googleapis/googleapis/blob/master/google/api/http.proto) syntax.

Parameters

parent	string
	Required. Resource name of the new finding's parent. Its format should be "organizations/[organization_id]/sources/[source_id]".

Parameters

findingId	string
	Required. Unique identifier provided by the client within the parent scope. It must be alphanumeric and less than or equal to 32 characters and greater than 0 characters in length.

The request body contains an instance of **Finding**
(/security-command-center/docs/reference/rest/v1beta1/organizations.sources.findings#Finding).

If successful, the response body contains a newly created instance of <u>Finding</u>
(/security-command-center/docs/reference/rest/v1beta1/organizations.sources.findings#Finding).

Requires the following OAuth scope:

- `https://www.googleapis.com/auth/cloud-platform`

For more information, see the <u>Authentication Overview</u>
(https://cloud.google.com/docs/authentication/).

Requires the following <u>Cloud IAM</u> (https://cloud.google.com/iam/docs) permission on the `parent`
resource:

- `securitycenter.findings.update`

For more information, see the <u>Cloud IAM Documentation</u> (https://cloud.google.com/iam/docs).
