State

Possible execution states for an environment.

Enums	
STATE_UNSPECIFIED	The environment's states is unknown.
DISABLED	The environment is not running and can't be connected to. Starting the environment will transition it to the STARTING state.
STARTING	The environment is being started but is not yet ready to accept connections.
RUNNING	The environment is running and ready to accept connections. It will automatically transition back to DISABLED after a period of inactivity or if another environment is started.
