

This page describes other Google Cloud products that integrate with Cloud Source Repositories.

Learn how to deploy your code from Cloud Source Repositories to App Engine.

[Quickstart \(/source-repositories/docs/quickstart-deploying-from-source-repositories-to-app-engine\)](/source-repositories/docs/quickstart-deploying-from-source-repositories-to-app-engine)

[How-to \(/source-repositories/docs/integrating-with-app-engine\)](/source-repositories/docs/integrating-with-app-engine)

Build integrations between Cloud Source Repositories and other systems using Pub/Sub.

[Quickstart \(/source-repositories/docs/quickstart-adding-pubsub-notifications\)](/source-repositories/docs/quickstart-adding-pubsub-notifications)

[How-to \(/source-repositories/docs/configuring-notifications\)](/source-repositories/docs/configuring-notifications)

Use Cloud Source Repositories to version control the code that contains your function.

[Quickstart \(/source-repositories/docs/quickstart-integrating-with-cloud-functions\)](/source-repositories/docs/quickstart-integrating-with-cloud-functions)

[How-to \(/source-repositories/docs/deploying-functions-from-source-repositories\)](/source-repositories/docs/deploying-functions-from-source-repositories)

Use Cloud Build to automatically deploy an application stored in Cloud Source Repositories to App Engine when there is a new commit.

[Quickstart \(/source-repositories/docs/quickstart-triggering-builds-with-source-repositories\)](/source-repositories/docs/quickstart-triggering-builds-with-source-repositories)

[How-to \(/source-repositories/docs/integrating-with-cloud-build\)](/source-repositories/docs/integrating-with-cloud-build)

Inspect the state of an application in real time, without stopping or slowing it down.

[Quickstart \(/source-repositories/docs/quickstart-integrate-debugger-with-source-repositories\)](/source-repositories/docs/quickstart-integrate-debugger-with-source-repositories)

[How-to \(/source-repositories/docs/debugging-source-repositories\)](/source-repositories/docs/debugging-source-repositories)

Add extensions to your development tools for fast access to your Cloud Source Repositories buckets and objects within them.

[IntelliJ \(/tools/intellij/docs/vcs\)](/tools/intellij/docs/vcs)

[Visual Studio \(/tools/visual-studio/docs/source-repo\)](/tools/visual-studio/docs/source-repo)

Learn how to upload source code to Cloud Source Repositories using Android Studio.

[Uploading from Android Studio \(https://cloud.google.com/tools/android-studio/vcs#uploading-source-code\)](https://cloud.google.com/tools/android-studio/vcs#uploading-source-code)
