Returns information about a repo.

GET `https://sourcerepo.googleapis.com/v1/{name=projects/*/repos/**}`

The URL uses gRPC Transcoding
(https://github.com/googleapis/googleapis/blob/master/google/api/http.proto) syntax.

Parameters

name	string
	The name of the requested repository. Values are of the form `projects/<project>/repos/<repo>`. Authorization requires the following Google IAM (https://cloud.google.com/iam) permission on the specified resource **name**: • `source.repos.get`

The request body must be empty.

If successful, the response body contains an instance of Repo
(/source-repositories/docs/reference/rest/v1/projects.repos#Repo).

Requires the following OAuth scope:

- `https://www.googleapis.com/auth/cloud-platform`

For more information, see the <u>Authentication Overview</u>
 (https://cloud.google.com/docs/authentication/).
