

This page describes some of the other Google Cloud products that are integrated with Cloud Spanner.

| Product | Links |
|---|--|
| App Engine flexible environment (/appengine/docs/flexible/) | Use Cloud Spanner client libraries (/spanner/docs/reference/libraries) in the App Engine flexible environment. |
| App Engine standard environment (/appengine/docs/standard/runtimes), second generation runtime | Use Cloud Spanner client libraries (/spanner/docs/reference/libraries) in second generation runtimes. |
| App Engine standard environment (/appengine/docs/standard/runtimes), first generation runtime | Use the REST API (/spanner/docs/reference/rest/) in first generation runtimes. |
| Dataflow (/dataflow/) | See Using the Dataflow connector (/spanner/docs/dataflow-connector), Exporting databases (/spanner/docs/export), and Importing databases (/spanner/docs/import). |
| Cloud Functions (/functions/) | Use Cloud Spanner client libraries (/spanner/docs/reference/libraries) from Cloud Functions. See Using Cloud Spanner with Cloud Functions (/spanner/docs/use-cloud-functions). |
| Cloud Storage (/storage) | Move Cloud Spanner databases to and from Avro files stored in Cloud Storage. See Exporting databases (/spanner/docs/export) and Importing databases (/spanner/docs/import). |
| Compute Engine (/compute/) | Use Cloud Spanner client libraries (/spanner/docs/reference/libraries) from within a Compute Engine instance. See Using Cloud Spanner in a virtual machine instance (/spanner/docs/configure-virtual-machine-instance). |
| GKE (/kubernetes-engine/) | Use Cloud Spanner client libraries (/spanner/docs/reference/libraries) with GKE. See Using Cloud Spanner in a virtual machine instance (/spanner/docs/configure-virtual-machine-instance). |
