Endless streaming tutorials

This page lists the sample applications that demonstrate how to transcribe a streaming audio feed from a microphone.

These samples require that you have set up `gcloud` and have created and activated a service account. For information about setting up `gcloud`, and also creating and activating a service account, see the [quickstart](https://cloud.google.com/speech-to-text/docs/quickstart) (<https://cloud.google.com/speech-to-text/docs/quickstart>).
