Cloud SQL (https://cloud.google.com/sql/)
Documentation (https://cloud.google.com/sql/docs/)
MySQL (https://cloud.google.com/sql/docs/mysql/) Reference

REST Resource: databases

Resource: Database

Represents a SQL database on the Cloud SQL instance.

JSON representation

<pre>{
  "kind": string,
  "charset": string,
  "collation": string,
  "etag": string,
  "name": string,
  "instance": string,
  "selfLink": string,
  "project": string,
  "sqlserverDatabaseDetails": {
    object (**SqlServerDatabaseDetails** (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1
  }
}</pre>

Fields	
kind	**string** This is always **sql#database** .
charset	**string** The MySQL charset value.

Fields	
`collation`	string The MySQL collation value.
`etag`	string This field is deprecated and will be removed from a future version of the API.
`name`	string The name of the database in the Cloud SQL instance. This does not include the project ID or instance name.
`instance`	string The name of the Cloud SQL instance. This does not include the project ID.
`selfLink`	string The URI of this resource.
`project`	string The project ID of the project containing the Cloud SQL database. The Google apps domain is prefixed if applicable.
`sqlserverDatabaseDetails`	object (SqlServerDatabaseDetails (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1beta4/databases#SqlServerDatabaseDetails))

SqlServerDatabaseDetails

Represents a Sql Server database on the Cloud SQL instance.

JSON representation

```
{
  "compatibilityLevel": integer,
  "recoveryModel": string
}
```

Fields

`compatibilityLevel`	`integer` The version of SQL Server with which the database is to be made compatible
`recoveryModel`	`string` The recovery model of a SQL Server database

Methods

delete (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1beta4/databases/delete)	Deletes a database from a Cloud SQL instance.
get (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1beta4/databases/get)	Retrieves a resource containing information about a database inside a Cloud SQL instance.
insert (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1beta4/databases/insert)	Inserts a resource containing information about a database inside a Cloud SQL instance.
list (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1beta4/databases/list)	Lists databases in the specified Cloud SQL instance.
patch (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1beta4/databases/patch)	Partially updates a resource containing information about a database inside a Cloud SQL instance.
update (https://cloud.google.com/sql/docs/mysql/admin-api/rest/v1beta4/databases/update)	Updates a resource containing information about a database inside a Cloud SQL instance.
