

[MySQL](#) (/sql/docs/mysql/configure-org-policy) | **PostgreSQL** | [SQL Server](#) (/sql/docs/sqlserver/configure-org-policy)

This page describes how to add connection organization policies on Cloud SQL instances, to put restrictions on public IP configurations of Cloud SQL at the project, folder, or organization level. For an overview, see [Connection organization policies](#) (/sql/docs/postgres/connection-org-policy).

1. [Sign in](https://accounts.google.com/Login) (https://accounts.google.com/Login) to your Google Account.

If you don't already have one, [sign up for a new account](https://accounts.google.com/SignUp) (https://accounts.google.com/SignUp).

2. In the Cloud Console, on the project selector page, select or create a Cloud project.

★ **Note:** If you don't plan to keep the resources that you create in this procedure, create a project instead of selecting an existing project. After you finish these steps, you can delete the project, removing all resources associated with the project.

[Go to the project selector page](https://console.cloud.google.com/projectselector2/home/dashboard) (https://console.cloud.google.com/projectselector2/home/dashboard)

3. Make sure that billing is enabled for your Google Cloud project. [Learn how to confirm billing is enabled for your project](#) (/billing/docs/how-to/modify-project).

4. [Install and initialize the Cloud SDK](#) (/sdk/docs/).

5. Add the **Organization Policy Administrator** role ([roles/orgpolicy.policyAdmin](#) (/iam/docs/understanding-roles#organization-policy-roles)) to your user or service account from the **IAM & Admin** page.

[Go to the IAM accounts page](https://console.cloud.google.com/iam-admin/iam) (https://console.cloud.google.com/iam-admin/iam)

6. See [Restrictions](#) (/sql/docs/postgres/connection-org-policy#restrictions) before performing this procedure.
