This page describes how to find the email address of a project's Cloud Storage service account. For an overview of Cloud Storage service accounts, including when they're created and how they're used, see Service Accounts for Cloud Storage (/storage/docs/projects#service-accounts). For a general overview of service accounts in Google Cloud, see Service Accounts (/iam/docs/service-accounts).

In order to perform this task, you must have **`resourcemanager.project.get`** (/resource-manager/docs/access-control-proj) ssion on the project you are checking.

To get the email address of a project's Cloud Storage service account:
