

This page shows you how to list the Cloud Storage buckets in a project, which are ordered in the list lexicographically by name. For an overview of buckets, read the [Key Terms](/storage/docs/key-terms#buckets) (/storage/docs/key-terms#buckets).

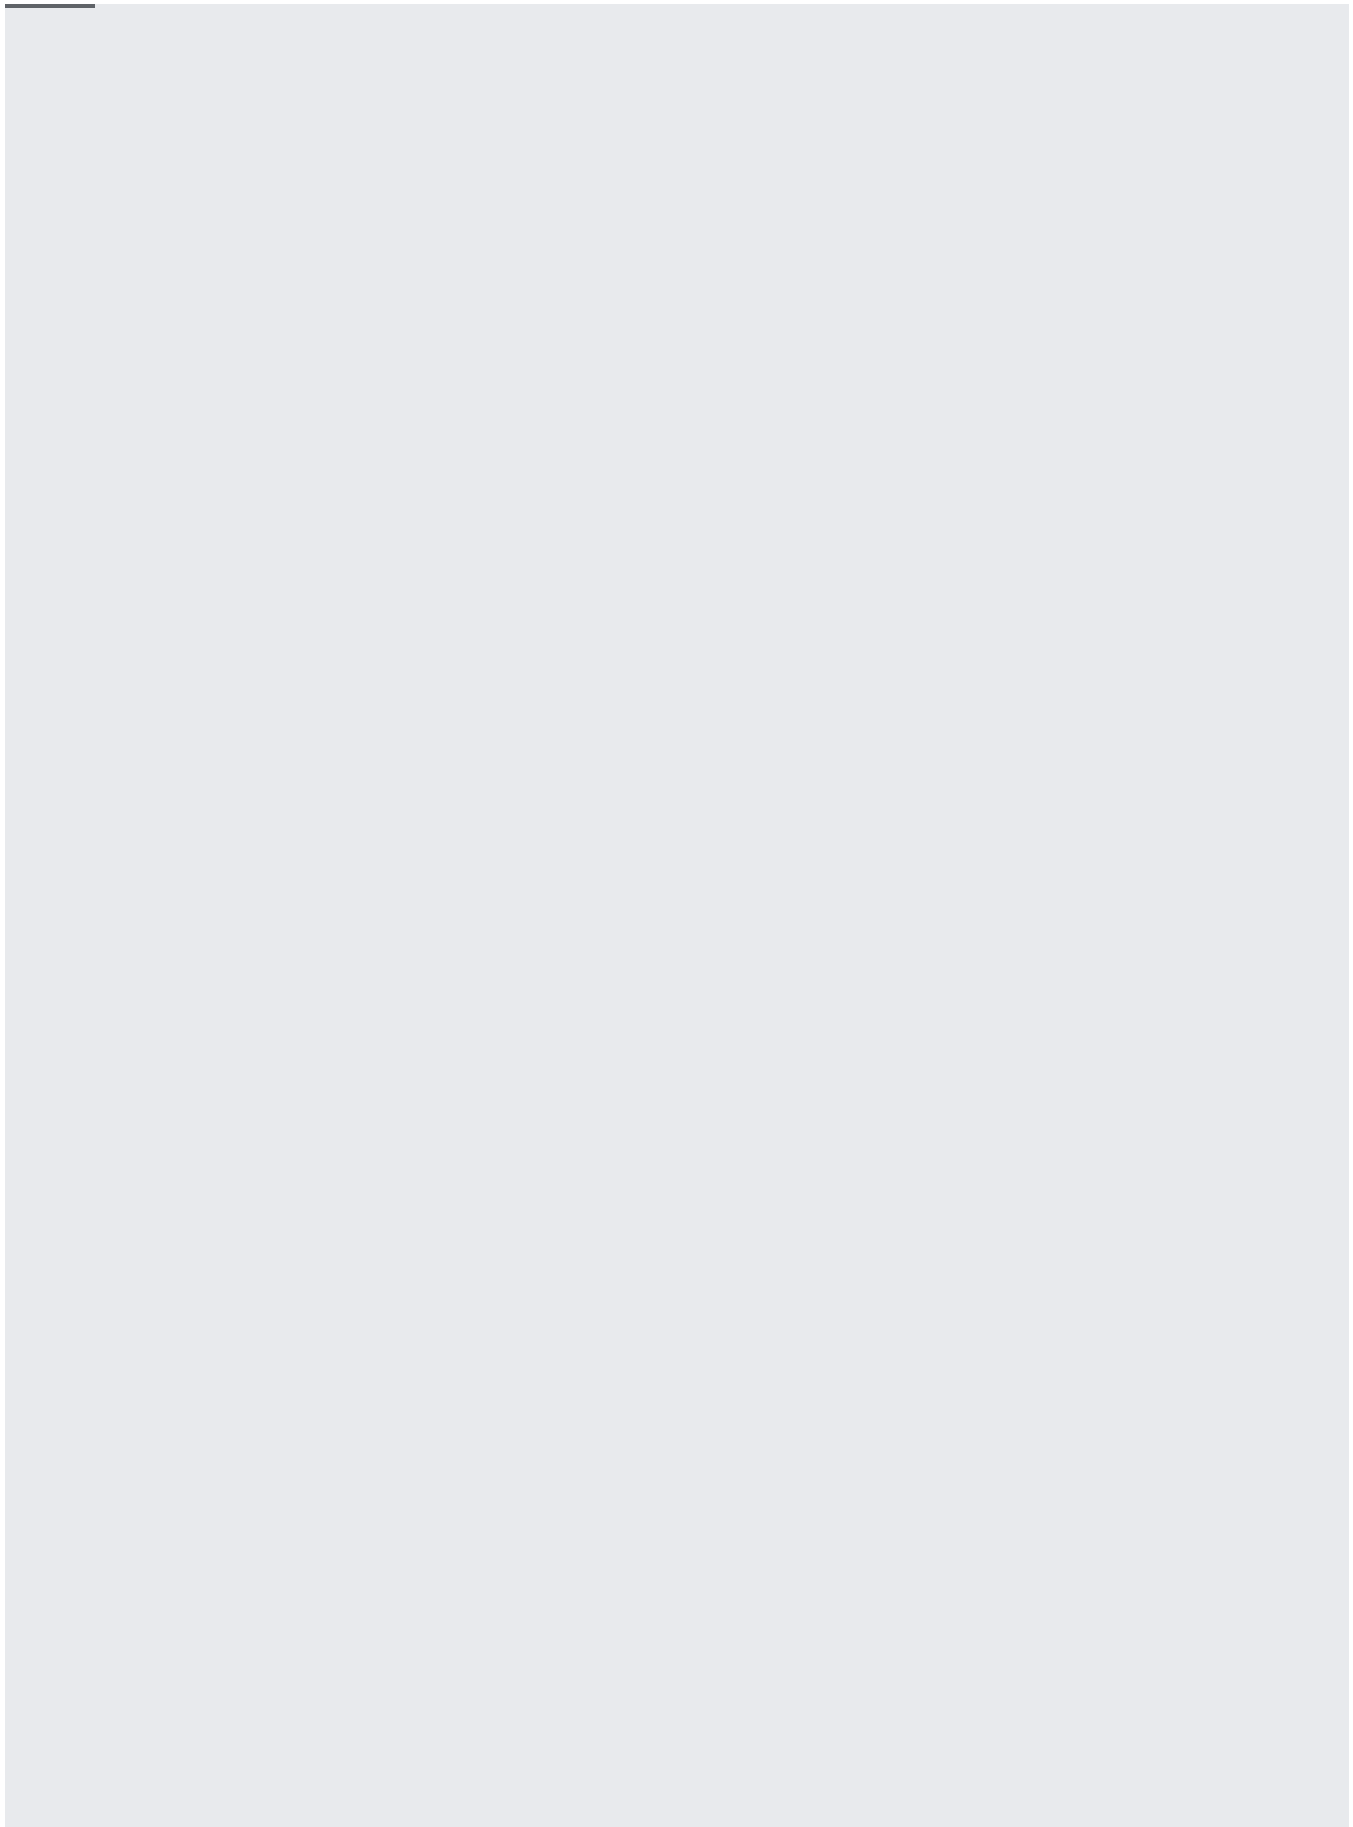

To list the buckets in a project:

- [Get information about a bucket \(/storage/docs/getting-bucket-information\)](/storage/docs/getting-bucket-information).
- [List the objects in a bucket \(/storage/docs/listing-objects\)](/storage/docs/listing-objects).
- [Move or rename a bucket \(/storage/docs/moving-buckets\)](/storage/docs/moving-buckets).
- [Delete a bucket \(/storage/docs/deleting-buckets\)](/storage/docs/deleting-buckets).
