

---

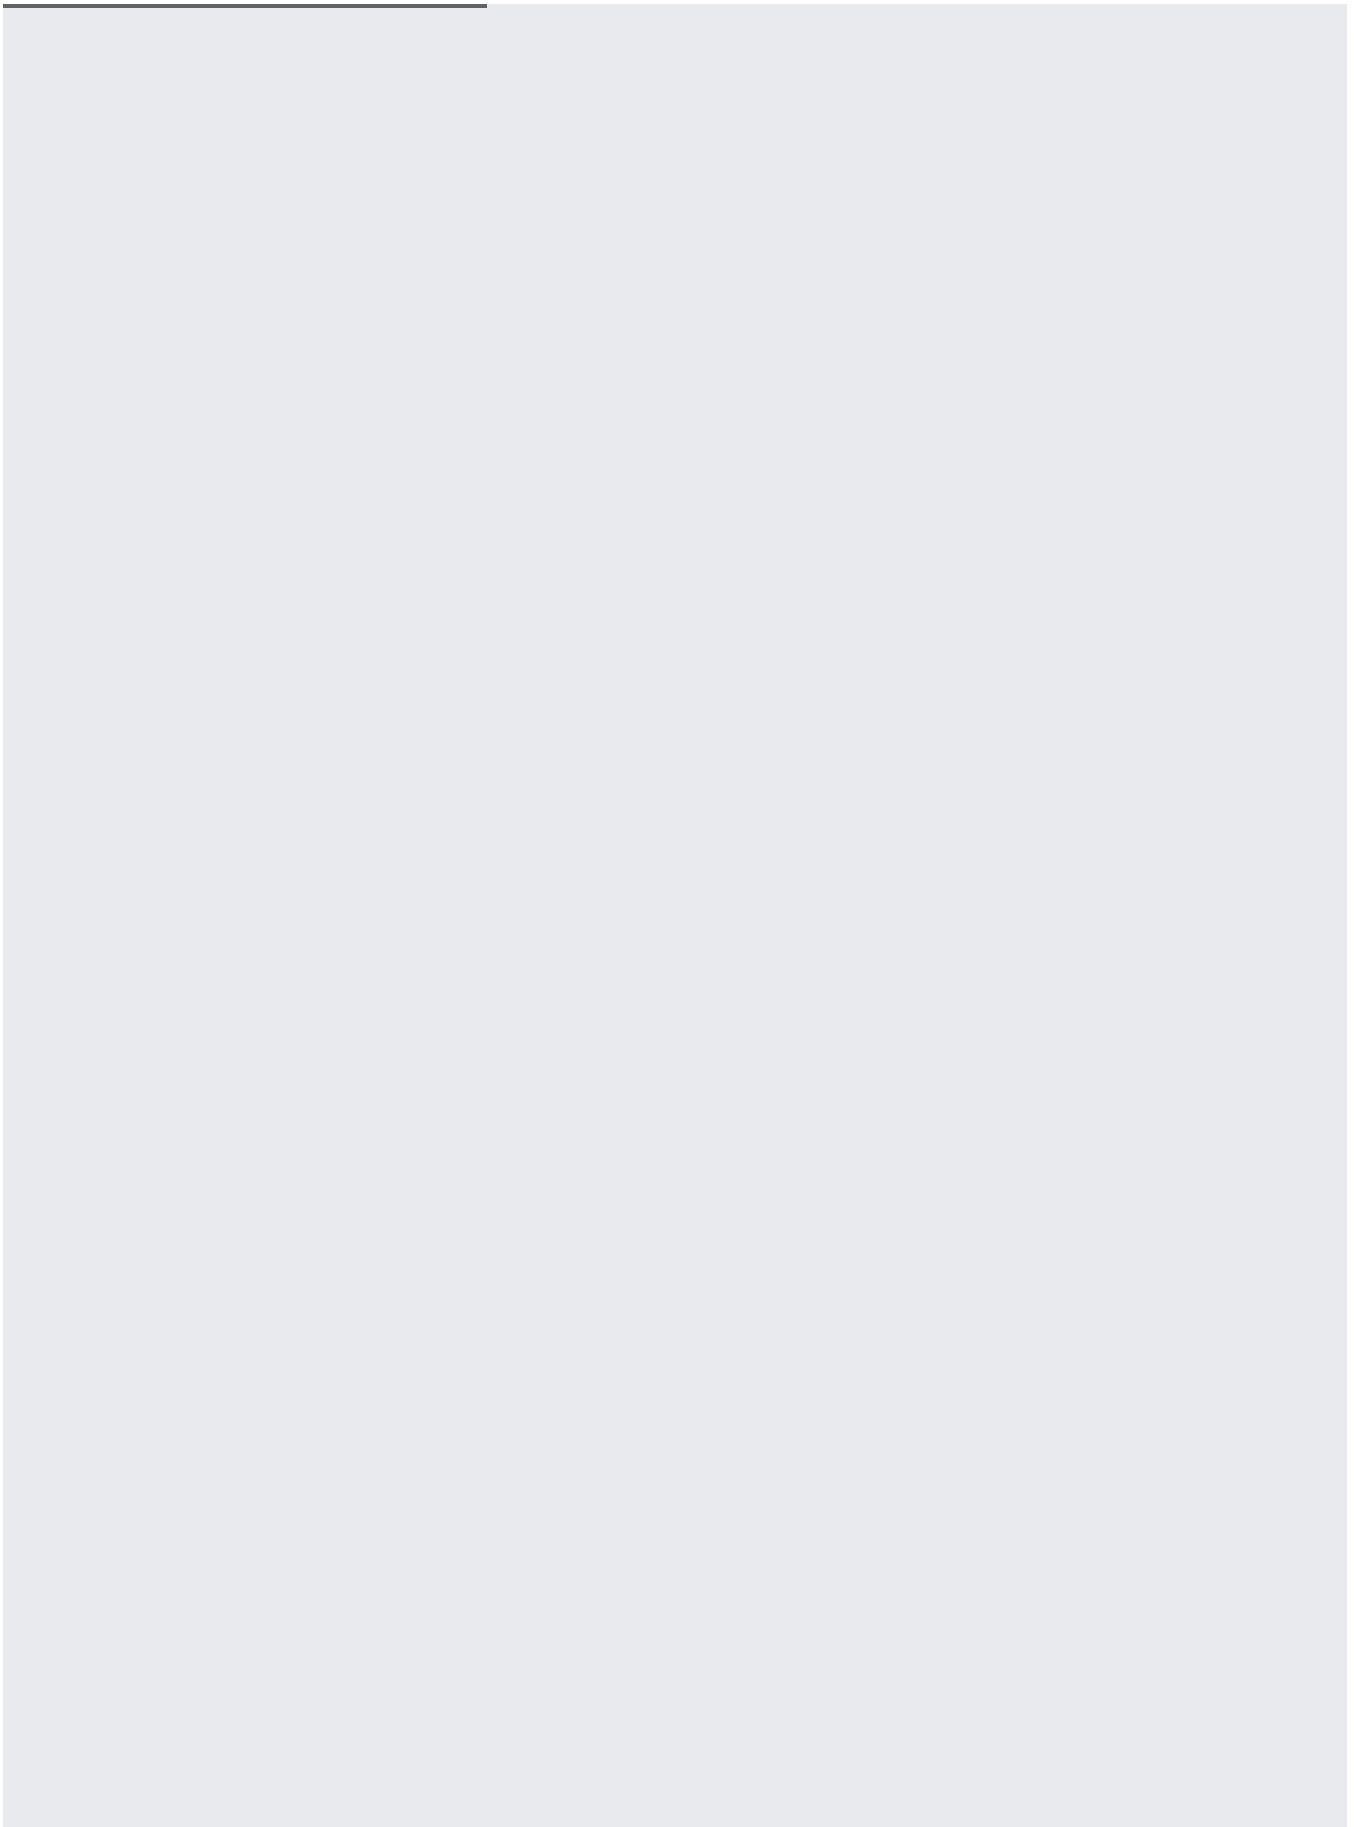

This page describes options for uploading objects to your Cloud Storage bucket. An uploaded object consists of the data you want to store along with any associated metadata. For an overview of objects, read the [Key Terms \(/storage/docs/key-terms#objects\)](/storage/docs/key-terms#objects) and see the [Object naming requirements \(/storage/docs/naming#objectnames\)](/storage/docs/naming#objectnames).

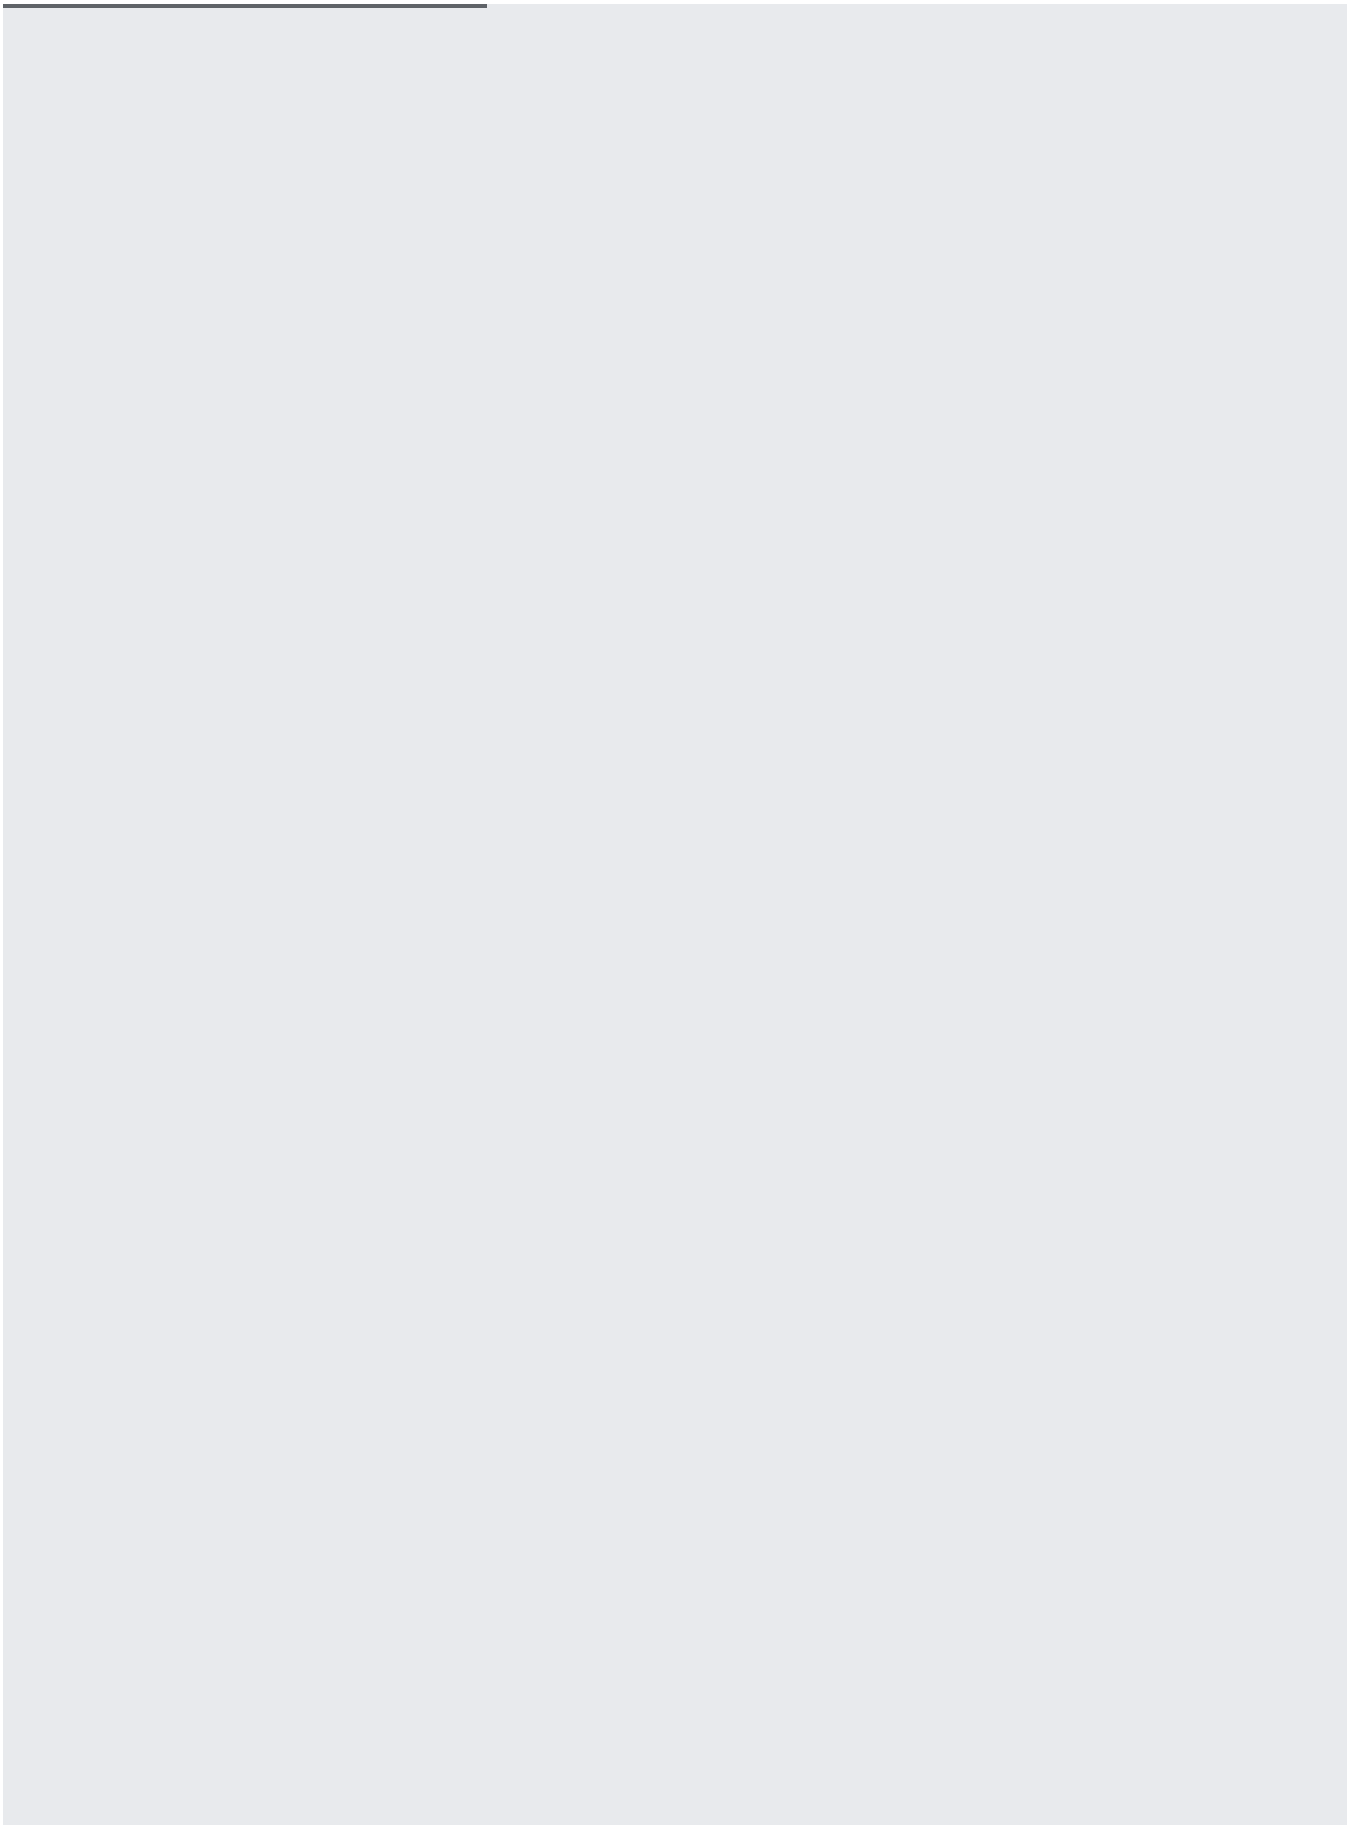

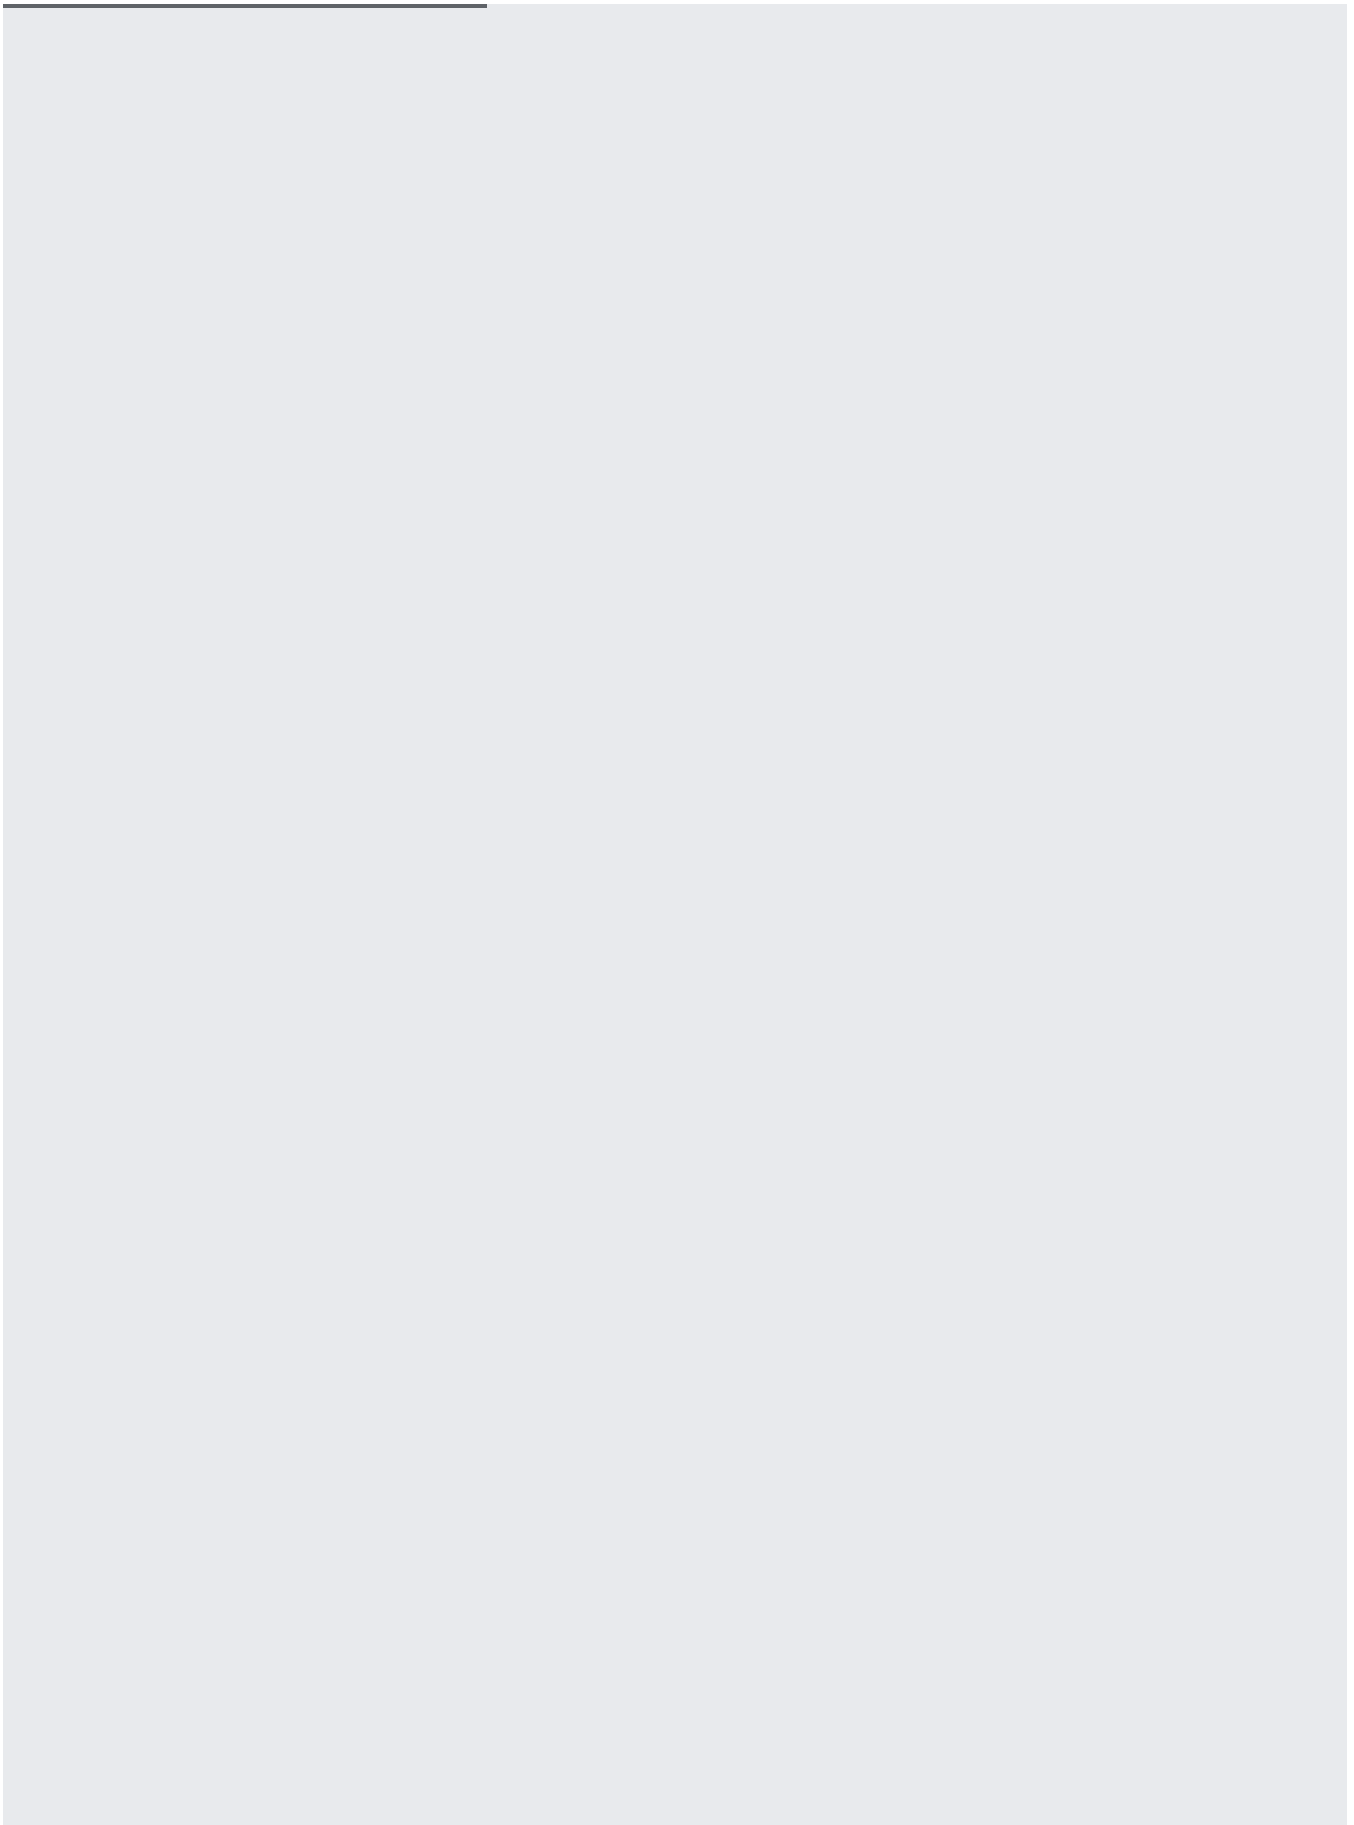

- [Make your data publicly accessible](/storage/docs/access-control/making-data-public) (/storage/docs/access-control/making-data-public).
- [View and edit your object metadata](/storage/docs/viewing-editing-metadata) (/storage/docs/viewing-editing-metadata).
- Learn how to [work with objects](/storage/docs/how-to#working-with-objects) (/storage/docs/how-to#working-with-objects) in your Cloud Storage buckets.
- [Control who has access](/storage/docs/access-control/) (/storage/docs/access-control/) to your objects and buckets.
- Learn about [parallel uploads and composing objects](/storage/docs/composite-objects) (/storage/docs/composite-objects).
