

[Job Search documentation](#)

Date

Represents a whole or partial calendar date, e.g. a birthday. The time of day and time zone are either specified elsewhere or are not significant. The date is relative to the Proleptic Gregorian Calendar. This can represent:

- A full date, with non-zero year, month and day values
- A month and day value, with a zero year, e.g. an anniversary
- A year on its own, with zero month and day values
- A year and month value, with a zero day, e.g. a credit card expiration date

Related types are `google.type.TimeOfDay`.

(<https://cloud.google.com/talent-solution/job-search/docs/reference/rest/v4beta1/JobQuery#TimeOfDay>) and `google.protobuf.Timestamp`.

JSON representation

```
{
  "year": number,
  "month": number,
  "day": number
}
```

Fields

year	number Year of date. Must be from 1 to 9999, or 0 if specifying a date without a year.
-------------	--

Fields	
month	number Month of year. Must be from 1 to 12, or 0 if specifying a year without a month and day.
day	number Day of month. Must be from 1 to 31 and valid for the year and month, or 0 if specifying a year by itself or a year and month where the day is not significant.
