This page documents production updates to Cloud Tools for PowerShell. You can check this page for announcements about new or updated features, bug fixes, known issues, and deprecated functionality.

To get the latest product updates delivered to you, add the URL of this page to your <u>feed reader</u> (https://wikipedia.org/wiki/Comparison_of_feed_aggregators), or add the feed URL directly: `https://cloud.google.com/feeds/cloud-tools-for-powershell-release-notes.md`

FEATURE Added the `New-GceNetwork` and `Remove-GceNetwork` cmdlets to add and remove Compute Engine Networks.

FEATURE Added the `-MaxBadRecords` parameter to the `Start-BqJob cmdlet`.

FIXED Fixed a bug in the `Fix-GkeCluster` cmdlet where the `-NodeVersion` parameter was not processed correctly.

FEATURE Launched the Beta release of the <u>GKE cmdlets</u> (/tools/powershell/docs/container).

FEATURE Launched the Beta release of the <u>BigQuery cmdlets</u> (/tools/powershell/docs/bigquery).

FEATURE The Cloud PowerShell cmdlets for <u>Pub/Sub</u> (/tools/powershell/docs/pubsub) and for <u>Stackdriver Logging</u> (/tools/powershell/docs/logging) are now GA.
