

Cloud Tools for Visual Studio

Finding a Google API Library

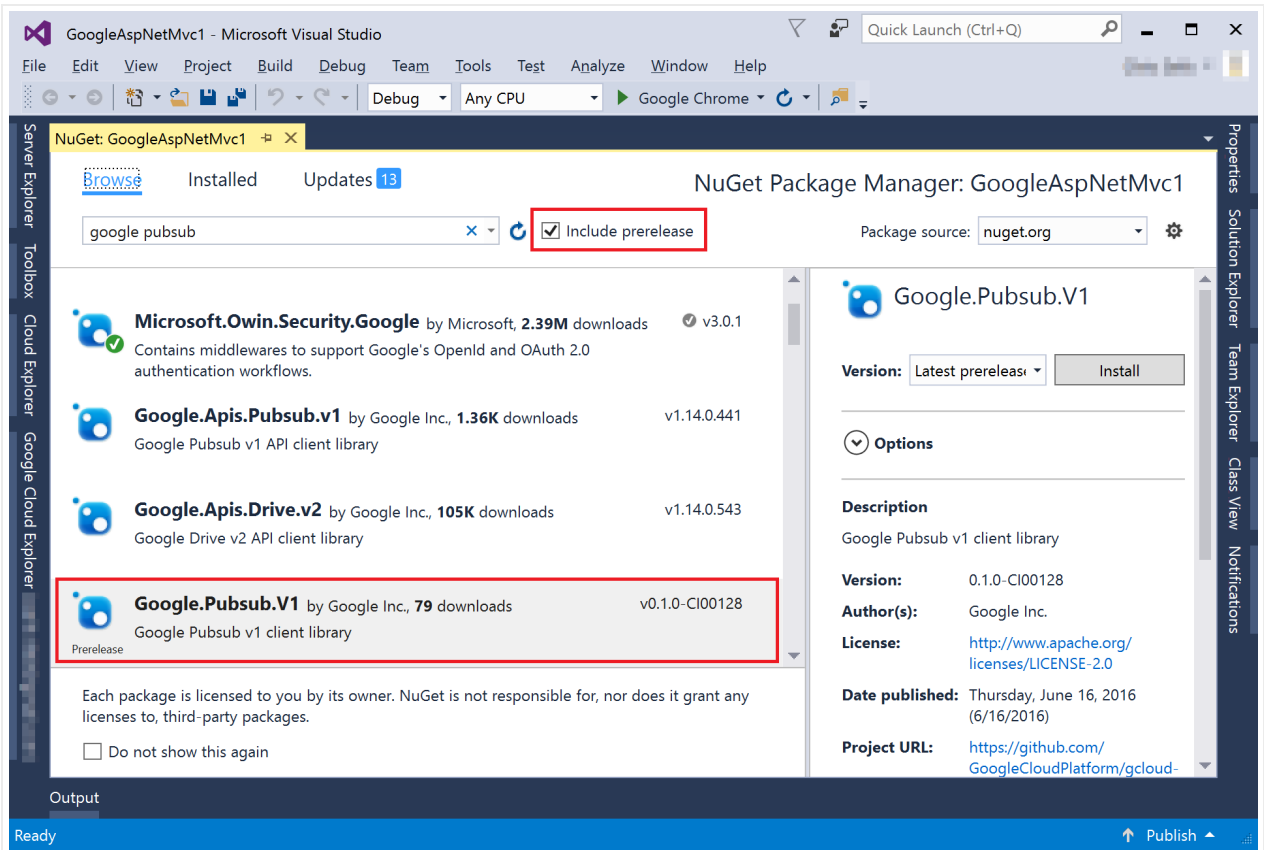

All Google APIs are available to .NET developers through the NuGet package manager.

To add them to your project within Visual Studio:

1. Right-click on **project references**.
2. Click **Manage NuGet Packages**.
3. Choose the **Browse** tab.
4. Before searching make sure **Include prerelease** is checked to show all Google Cloud libraries.

★ **Note:** Some of the libraries listed are ****Beta****.

5. Enter a search string, for example **google pubsub**.

Searching returns two different types of results:

- Results with a **Google.Apis** prefix are NuGet libraries that are available for all Google APIs. Here is the [complete list](https://developers.google.com/api-client-library/dotnet/) (<https://developers.google.com/api-client-library/dotnet/>).
- Results with a **Google.Cloud** prefix are NuGet libraries that are hand-crafted for ease of use and familiarity for .NET developers:
 - Here is the [complete list](https://googleapis.github.io/google-cloud-dotnet/) (<https://googleapis.github.io/google-cloud-dotnet/>) of these **Beta** libraries. We recommend using these libraries if you are comfortable with their pre-release status.
 - These libraries are being actively developed as open source, so [we invite you to contribute](https://googleapis.github.io/google-cloud-dotnet/) (<https://googleapis.github.io/google-cloud-dotnet/>) if we've missed your favorite features.
