

You can cancel a data capture job that is in progress. When a job is canceled, any files already captured by the job remain on Transfer Appliance. You can restart a canceled job, which resumes from the last job checkpoint. Cancelled jobs display a **Stopped** status in the **Jobs Monitor** window.

To cancel a running data capture job:

1. Open the Transfer Appliance Web User Interface.
2. In the **Jobs Monitor** pane, identify the job you want to cancel.
3. Click the **More** icon next to the job and click **Abort**.
4. When the confirmation dialog appears, click **OK**.

If your data size exceeds the capacity of a single Transfer Appliance, [capture your data using multiple appliances in succession](/transfer-appliance/docs/2.0/performing-serial-captures) (/transfer-appliance/docs/2.0/performing-serial-captures).

To retry a transfer job, see [Retrying unsuccessful data capture jobs](/transfer-appliance/docs/2.0/retrying-failed-jobs) (/transfer-appliance/docs/2.0/retrying-failed-jobs).

To monitor:

- data capture jobs, see [Monitoring data capture jobs](/transfer-appliance/docs/2.0/monitoring-capture-jobs) (/transfer-appliance/docs/2.0/monitoring-capture-jobs).
- Transfer Appliance storage usage, see [Monitoring appliance storage usage](/transfer-appliance/docs/2.0/monitoring-appliance-storage) (/transfer-appliance/docs/2.0/monitoring-appliance-storage).
- disk status, see [Monitoring disk status](/transfer-appliance/docs/2.0/monitoring-disk-status) (/transfer-appliance/docs/2.0/monitoring-disk-status).

If you are done capturing data, see [Preparing and shipping an appliance](/transfer-appliance/docs/2.0/shipping-appliance) (/transfer-appliance/docs/2.0/shipping-appliance).
