Lists information about the supported locations for this service.

GET https://automl.googleapis.com/v1beta1/{name}/locations

Parameters

name	string
	The resource that owns the locations collection, if applicable.

Parameters

filter	string
	The standard list filter.
pageSize	integer
	The standard list page size.
pageToken	string
	The standard list page token.

The request body must be empty.

If successful, the response body contains an instance of <u>ListLocationsResponse</u>
(/automl/docs/reference/rest/Shared.Types/ListLocationsResponse).

Requires the following OAuth scope:

- **https://www.googleapis.com/auth/cloud-platform**

For more information, see the <u>Authentication Overview</u>
(https://cloud.google.com/docs/authentication/).
