

Creates a model. Returns a Model in the response

(/video-

intelligence/automl/docs/reference/rest/v1beta1/projects.locations.operations#Operation.FIELDS.response)

field when it completes. When you create a model, several model evaluations are created for it: a global evaluation, and one evaluation for each annotation spec.

POST <https://automl.googleapis.com/v1beta1/{parent}/models>

Parameters

parent

string

Resource name of the parent project where the model is being created.

Authorization requires the following [Google IAM](#)

(<https://cloud.google.com/iam>) permission on the specified resource

parent:

- **automl.models.create**

The request body contains an instance of Model

(/video-intelligence/automl/docs/reference/rest/v1beta1/projects.locations.models#Model).

If successful, the response body contains a newly created instance of Operation

(/video-intelligence/automl/docs/reference/rest/v1beta1/projects.locations.operations#Operation).

Requires the following OAuth scope:

- <https://www.googleapis.com/auth/cloud-platform>

For more information, see the [Authentication Overview](https://cloud.google.com/docs/authentication/)
(<https://cloud.google.com/docs/authentication/>).
