

Lists information about the supported locations for this service.

GET `https://automl.googleapis.com/v1beta1/{name}/locations`

Parameters

`name` **string**

The resource that owns the locations collection, if applicable.

Parameters

`filter` **string**

The standard list filter.

`pageSize` **number**

The standard list page size.

`pageToken` **string**

The standard list page token.

The request body must be empty.

If successful, the response body contains data with the following structure:

The response message for [Locations.ListLocations](#)

(/video-intelligence/automl/docs/reference/rest/v1beta1/projects.locations/list#google.cloud.location.Locations.ListLocations)

.

JSON representation

Fields

locations[]	object(<u>Location</u>) (/video-intelligence/automl/docs/reference/rest/v1beta1/projects.locations#Location))
--------------------	---

A list of locations that matches the specified filter in the request.

nextPageToken	string
