

- [Expr](#) (/video-intelligence/automl/docs/reference/rpc/google.type#google.type.Expr) (message)

Represents an expression text. Example:

## Fields

<b>expression</b>	<b>string</b>
	Textual representation of an expression in Common Expression Language syntax.  The application context of the containing message determines which well-known feature set of CEL is supported.
<b>title</b>	<b>string</b>
	An optional title for the expression, i.e. a short string describing its purpose. This can be used e.g. in UIs which allow to enter the expression.
<b>description</b>	<b>string</b>
	An optional description of the expression. This is a longer text which describes the expression, e.g. when hovered over it in a UI.

## Fields

### location

**string**

An optional string indicating the location of the expression for error reporting, e.g. a file name and a position in the file.
