[Documentation](#)

Quotas and limits

Beta

This product is in a pre-release state and might change or have limited support. For more information, see the [product launch stages](https://cloud.google.com/products/#product-launch-stages) (<https://cloud.google.com/products/#product-launch-stages>).

This page describes current restrictions and usage quotas on use of AutoML Video Intelligence Classification and is updated to reflect any changes to said restrictions and usage quotas.

These quotas apply to each AutoML Video Classification project and are shared across all applications and IP addresses using a given project.

Quotas

You can request an increase to your quotas from the [Google Cloud Console](https://console.cloud.google.com/) (<https://console.cloud.google.com/>). To learn more, see the information on [managing your quotas](https://cloud.google.com/docs/quota) (<https://cloud.google.com/docs/quota>).

| Activity | Default quota |
|-----------------------------|----------------------------|
| Requests | 600 per minute per project |
| Create model requests | 10 per minute per project |
| Concurrent model creation | 5 per project |
| Concurrent batch prediction | 5 per project |

Limits

| Type of limits | Value |
|----------------------------|--------------------------|
| Maximum video length | 3 hours |
| Maximum video file size | 50GB |
| Minimum labels per dataset | 2 |
| Minimum videos per label | 10 (1000 is recommended) |
