The Video Intelligence API includes the following beta features:

- **Logo recognition** - Video Intelligence can detect, track, and recognize the presence of over 100,000 brands and logos in video content. Learn more (/video-intelligence/docs/logo-recognition).

- **Celebrity recognition** - Video Intelligence can be used to recognize celebrities in a video. Learn more (/video-intelligence/docs/celebrity-recognition)

- **Streaming** - Video Intelligence can provide streaming video annotation from a file. Learn more (/video-intelligence/docs/streaming/streaming).

- **Live streaming** - Video Intelligence can perform video annotation from a live video feed. Learn more (/video-intelligence/docs/streaming/live-streaming-overview)

See Beta Client Libraries (/video-intelligence/docs/beta-libraries) for information on downloading the client libraries for beta features.
