

ature is in a pre-release state and might change or have limited support. For more information, see the [product launch stages](#) ([/products/#product-launch-stages](#)).

With Video Intelligence Streaming API you can detect and track objects in live-streamed multimedia data. Real-time analysis of the data is then available through the API.

The following [configuration JSON object](#)

(<https://github.com/google/aistreamer/tree/master/ingestion/client/cpp/config/object.json>) shows how to use [AIStreamer](#) (<https://github.com/google/aistreamer/tree/master/ingestion>) live object tracking to annotate a streaming video.

The AIStreamer returns a response similar to the following example.
