

ature is in a pre-release state and might change or have limited support. For more information, see the [product launch stages](#) ([/products/#product-launch-stages](#)).

The Video Intelligence Streaming API supports live shot change detection with live streaming input of media data, and real-time streaming output of analysis results.

The following [configuration JSON object](#)

(<https://github.com/google/aistreamer/tree/master/ingestion/client/cpp/config/shot.json>) shows how to use [AIStreamer](#) (<https://github.com/google/aistreamer/tree/master/ingestion>) live shot change detection to annotate a streaming video.

The AIStreamer returns a response similar to the following example.
