Cloud VPN documentation

Cloud VPN securely extends your [peer](#)

(<https://cloud.google.com/vpn/docs/concepts/overview#peer-definition>) network to Google's network through an IPsec VPN tunnel. Traffic is encrypted and travels between the two networks over the public internet. Cloud VPN is useful for low-volume data connections.

For additional connection options, see the [Cloud Interconnect](https://cloud.google.com/interconnect/) (<https://cloud.google.com/interconnect/>) product page.
